CHOICE HERBACEOUS PEONIES

For centuries the Peony has held its place as the most magnificent and beautiful of perennial flowering plants. They are hardy in the coldest climates and thrive in practically all parts of the temperate zone.

The soil best suited to their culture is a natural loam with a clay subsoil. They do not require humus or peat moss and manure should not be used in the soil preparation. A little bonemeal mixed with the soil at time of planting is best suited to the needs of the plants in after years.

Planting should be done during the fall months for best results. From early September until garden work is interrupted by unfavorable winter weather. In planting, dig generous holes and loosen the soil in the bottom of the hole. Set the roots so the eyes are pointing upward and so that they will be about two to two and a half inches below the surface of the soil when planting is completed. Firm the soil about the roots.

DOUBLE AND SEMI-DOUBLE.

WHITE, BLUSH and YELLOW TINTED.

	Each
Alesia	\$3.00
Alice Harding	1.50
Baroness Schroeder60
